Claim Objections

Claims 9,10,12 and 13 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 5 depends from claim 3, which detects loss of purge gas pressure within the frame. Claim 9 depends from claim 5, with both claims sensing an interruption in the surface of the window. Claim 10 is identical to claim 6. Claims 12 and 13 depend from claim 9 and also repeat limitations recited in claims 9,5 and 3.

Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jackson.

Allowable Subject Matter

Claim 3-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7 and 11 are allowed.

Art Unit: 2836

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest detecting lost of purging gas within a flexible window's frame or the use of the frame as a spark arrestor.
